High Speed Macerator Replacement

Over the past 15 years, Mono Pumps has replaced hundreds of macerators with the SB Muncher® unit.

Why have we been so successful in replacing the macerator? Because we offer the following benefits:

- 3 year warranty on raw sewage
- Lower power - up to 85% less than a 250/300mm macerator
- Lower speed - offers reduced wear rates and lower maintenance
- Ease of installation - can be retrofitted to replace existing macerators

Some of the high speed macerators replaced with SB Munchers and Tri-Hammer macerators

Tri-Hammer Macerator Retrofits

Whilst hundreds of old, high speed macerators are being replaced with SB Munchers, we realise that for some customers the replacement of a Tri-Hammer macerator is more economical.

The cost of a new M18 macerator can be little more than a full overhaul of the old high speed macerator and it has a big energy advantage as well - 2.2kW as opposed to 5.5kW.

Other benefits against the older macerators are:

- Anti swirl fins to assist flow into the impeller
- Oil filled mechanical seal eliminates dry run
- Tri-Hammer impeller offering better static balance and improved maceration

So, if your old Mutrator system is in need of an overhaul, you have the option of upgrading to a low speed grinder or retrofitting an energy efficient Tri-Hammer macerator.

It is easy to retrofit an M18 macerator!
